

# NEW WORLDWIDE TANKER NOMINAL FREIGHT SCALE

applying to the carriage of oil in bulk  
Code name

## "WORLDSCALE"

**AS REVISED EFFECTIVE 1st JANUARY 2015**

The revised rates and conditions set out herein are effective for all voyages on which loading is commenced on or after 1st January 2015 (except in the case of amendments that are notified by circulars as being effective from subsequent dates).

### **Jointly sponsored and issued by**

### **NOTICE**

The first edition of the New Worldwide Tanker Nominal Freight Scale came into effect on 1st January 1989. This document is a revised edition and does not constitute a new or separate freight scale. Neither of the Associations accept any responsibility for any loss (including consequential loss), expenses or damages arising out of any inaccuracy, breach of contract, the commission of any tort or any other infringement of any rule of law, duty or obligation recognised in any system of law, relating to the preparation or distribution of this document (and any amendment or supplement thereto) or to the contents thereof. No warranties are made, express or implied by either Association, with regard to the contents of this document, its merchantability, or fitness for a particular purpose.

## **PREAMBLE PART A**

## **EXPLANATORY NOTES**

### **1. DEFINITIONS**

the Associations Worldscale Association (London) Limited, a company incorporated in England  
and  
Worldscale Association (NYC) Inc., a company incorporated in the USA

Worldscale      New Worldwide Tanker Nominal Freight Scale - i.e. the entire scale, comprising rates, fixed and variable rate differentials, and terms and conditions, etc. including but not limited to the rates, fixed and variable rate differentials, and terms and conditions contained in the Schedule.

the Schedule      the printed book as issued from time to time by the Associations.

the Preamble      that part of the Schedule, which precedes the rates pages, numbered "Preamble 1, Preamble 2", et seq.

USD      dollar (\$), the currency of the United States of America.

tonne      a metric ton, i.e. 1000 kilograms.

USD/MT      dollars per tonne.

standard vessel      a vessel as described in Section 4 of Part A of the Preamble.

### **2. AREAS**

Subscribers are (unless otherwise agreed with a particular Association) required to pay fees to the Association in whose area they are resident as follows:

NEW YORK      If resident in North, Central or South America or the Caribbean Islands (including the Bahamas), Bermuda, Greenland, or Hawaii.

LONDON      If resident elsewhere.

Each Association maintains a comprehensive computer record of all rates calculated and enquiries should normally be made to the Association to which fees have been paid. If a rate is urgently required when the office of that Association is closed, an enquiry may be put to the other Association, giving the registered subscriber number.

### **3. GENERAL**

- (1) Like its predecessors, the New Worldwide Tanker Nominal Freight Scale (Worldscale) is intended merely as a standard of reference to assist subscribers to conduct business.

It includes a number of "Terms and Conditions", which are set out in Part B of the Preamble.

Any additional "Terms and Conditions" applying to a particular port or trans-shipment area, which is not mentioned in Part D of the Preamble, will be stated when quoting the requested rate for the voyage in question.

Contracting parties are free to vary the "Terms and Conditions" as they see fit.

- (2) The responsibility of each of the Associations is limited to providing subscribers with rates for voyages calculated in accordance with the basis of calculation described in Section 4 of Part A of the Preamble and to revising Worldscale in accordance with the procedure described in Section 9 of Part A of the Preamble.

The application of the rates, rate differentials and demurrage rates and the application or interpretation of the "Terms and Conditions" are matters which are solely the concern of the contracting parties and neither of the Associations will undertake to resolve disputes that may arise between subscribers.

- (3) The nominal rate for a voyage does not in itself have any significance as representing a fair or reasonable rate for the standard vessel or any other size and/or type of vessel at any particular time.
- (4) Market levels of freight are to be expressed in terms of a percentage of the nominal freight rate. Thus Worldscale 100 would mean the rate for the voyage in question as calculated and issued by the Associations, while Worldscale 175 would mean 175 per cent of that rate and Worldscale 75 would mean 75 per cent of that rate.
- (5) Rates are calculated and quoted only in USD per tonne. However, freight may of course be payable in any currency and the contracting parties should specify clearly the currency of payment and the method to be used to determine the rate of exchange to apply if the currency of payment is to be

other than USD.

(6) Rates are shown in the Schedule under the port or ports of discharge.

For an explanation of how to obtain rates for voyages involving loading at ports in the Arabian Gulf, Black Sea, or Lake Maracaibo, please refer to the ADDITIONS link.

(7) Rates for voyages not shown in the Schedule are available upon application to either of the Associations; as are rates for voyages involving ports and/or trans-shipment areas not mentioned in Part D of the Preamble.

(8) The fixed and variable rate differentials mentioned on pages D-1/D-8 must be taken into consideration when using Worldscale rates.

Any fixed or variable rate differential applying to a particular port or trans-shipment area, which is not mentioned in Part D of the Preamble, will be stated when quoting the requested rate for the voyage in question.

#### **4. BASIS OF CALCULATION**

All rate calculations, which are made in USD, are per tonne for a full cargo for the standard vessel based upon a round voyage from loading port or ports to discharging port or ports and return to first loading port using the under-mentioned factors.

All of the factors shown are purely nominal and for rate calculation purposes only. In particular, the fixed hire element of USD 12,000 per day is not intended to represent an actual level of operating costs, nor to produce rates providing a certain level of income or margin of profit, either for the standard vessel or for any other vessel under any flag.

##### **(a) Standard Vessel**

Total Capacity 75,000 tonnes

(i.e. the vessel's capacity for cargo plus stores, water, and bunkers, both voyage and reserve; also see Section 5 (2) of Part A of the Preamble).

Average service speed 14.5 knots

Bunker Consumption

Steaming 55 tonnes per day

Purposes other 100 tonnes per round voyage

than steaming

In port 5 tonnes for each port involved in the voyage

Grade of fueloil 380 cst

**(b) Port Time** 4 days for a voyage from one loading port to one discharging port; an additional 12 hours being allowed for each extra port involved on a voyage

**(c) Fixed Element** **Hire** USD 12,000 per day

\* **(d) Bunker Prices**

(i) Bunker Price 380 cst USD 614.81 per tonne

This price represents the average worldwide price for fueloil (380 cst) during the period 1st October 2013 to 30th September 2014 as assessed by LQM Petroleum Services, Inc.

(ii) Low Sulphur Bunkers - **European In-Port bunker ports and Baltic and North Sea ECA**

Application of low sulphur fuels is stated in Section 5 (10) of the Preamble and D-1 Fixed Differential 1. Baltic and North Sea ECA

Bunker Price 0.1% Sulphur USD 920.75 per tonne

(iii) Low Sulphur Bunkers - **North American ECA & U.S. Caribbean ECA**

Application of low sulphur fuels is stated in Section 5 (10) of the Preamble and D-1 Fixed Differential 2. North American ECA & U.S. Caribbean ECA

Bunker Price 0.1% Sulphur USD 1028.02 per tonne

These prices represent the average price for low sulphur fuels in the areas requiring their use during the period 1st October 2013 to 30th September 2014 as assessed by LQM Petroleum Services Inc.

\* **(e) Port Costs**

Port costs used are those assessed by the Associations in the light of information available to them up to the end of September 2014, the rate of exchange used for converting costs in a local currency to USD being the average applicable during the period 1st October 2013 to 30th September 2014.

For the guidance of subscribers the following list of sample exchange rates is given.

|              |          |   |       |
|--------------|----------|---|-------|
| Euro         | 0.7366   | = | 1 USD |
| Japanese Yen | 102.25   | = | 1 USD |
| U.K. Pound   | USD 1.66 | = | £1    |

#### **(f) Canal Transit Time**

24 hours is allowed for each transit of the Panama Canal.

30 hours is allowed for each transit of the Suez Canal.

Mileage is not taken into account in either case.

\* See also Section 9 of Part A of the Preamble.

### **5. NOTES ON CALCULATIONS**

- (1) It is assumed that the standard vessel is able to navigate the selected route to reach and load or discharge at the ports concerned. See Section 6 of Part A of the Preamble for a description of the Route Policy.
- (2) Bunkers are deemed to be available at every port at the bunker price stated in Section 4 of Part A of the Preamble and, for the purposes of calculating cargo quantity, it is assumed that 50 per cent of the total bunkers acquired for the round voyage are acquired at the first loading port.
- (3) The port time mentioned under item (b) in Section 4 of Part A of the Preamble is deemed to include the laytime of 72 hours mentioned in Section 2 of Part B of the Preamble.
- (4) Rates are calculated for voyages with loading and discharging ports in whatever order is requested, irrespective of whether that order is consistent with the principle of geographical rotation.
- (5) No allowance is made for any Tax on Freight or Income Tax, nor is there any provision as to whether such Taxes are for Owners' or for Charterers' Account.
- (6) No allowance is made for any additional Marine Insurance on hull or machinery, including War Risk Insurance, which may be incurred when trading to or from certain areas.

- (7) No allowance is made for deviation for any purpose whatsoever.
- (8) No allowance is made for any deballasting expenses, nor is there any provision as to whether such costs are for Owners' or Charterers' Account.
- (9) An Allowance has been made for ISPS costs in ports whenever such costs have been advised to the Associations.
- (10) For ports and trans-shipment areas within the European Union (EU), Norway, Iceland, Turkey and within the areas of the Baltic and North Sea ECA, North American ECA and the Caribbean ECA, an allowance has been made for the increase in costs of fuel with a content not exceeding 0.1% sulphur used within these ports and locations.

[BACK TO CONTENTS](#)

## **6. ROUTE POLICY/DISTANCES**

- (1) Normal Shipping Route and Alternatives.

The following route indicators are used both in the Schedule and when quoting rates in response to requests from subscribers.

C which means via Cape of Good Hope, laden and in ballast.  
 CS which means via Cape of Good Hope, laden, Suez Canal in ballast.  
 S which means via Suez Canal, laden and in ballast.  
 P which means via Panama Canal, laden and in ballast.  
 CP which means via Cape of Good Hope, laden, Panama Canal in ballast.  
 H which means via Cape Horn, laden and in ballast.  
 CH which means via Cape of Good Hope, laden and in ballast, and Cape Horn, laden and in ballast.

Except as otherwise explained, the route used for a rate shown in the Schedule (for the round voyage from loading port or ports to discharging port or ports and return to first loading port) is that which produces the lowest rate for the voyage in question at Worldscale 100.

In most cases, such a route is that via the most direct normal shipping route, which usually means via whatever route provides the shortest distance (see Paragraph 6). However, in those cases where, for rate calculation purposes, extra time is allowed for transit of a canal and/or an allowance made for expenses incurred for transit of a canal, waterway or strait, the rate shown may not be via the route with the shortest distance but via a route which, although longer, nevertheless produces the lowest rate. In deciding which route produces the lowest rate, the fixed rate differentials for Panama Canal and/or Suez Canal transits as applicable to the standard vessel are taken into account.

Rates are shown in the Schedule for both of the following routes whenever they are viable alternatives:

(a) Suez Canal, laden and in ballast, (S); and

(b) Cape of Good Hope, laden and in ballast, (C);

also, in some cases, a rate is shown via a third route, namely

(c) Cape of Good Hope, laden, Suez Canal in ballast, (CS),

whenever such a route produces the lowest rate.

The parties to a contract should agree which one of the two or three rates should apply.

(2) There are several assumptions used within normal and alternative routes, for example:

When calculating rates for voyages which involve passage through Danish waters (Great Belt and Sound) from Skaw to the Baltic Sea or vice versa it is assumed that the vessel will proceed via the Great Belt when laden (fully or partly) and via the Sound when in ballast, notwithstanding that a route via the Sound or the Little Belt, both laden and in ballast, may produce a lower rate.

It is assumed that the standard vessel is able to navigate unhindered in the Japanese Inland Sea.

(3) Unconventional Routes.

There are several examples of routes that are not included in the calculation of the lowest rate as they are not classed as using normal shipping routes. Any unconventional route where calculated may produce a lower rate. Such voyages will be provided by the Associations and available on the web-site. Subscribers may request calculation using these routes where they are not currently provided. The use of such a rate will be dependant upon specific agreement between the contracting parties.

Examples of such Unconventional Routes that are not used in the calculation of the cheapest rate, notwithstanding that they may produce lower rates are:

Cape Cod Canal (except for voyages involving Sandwich (Mass.))

Chesapeake and Delaware Canal

Kiel Canal

Passages through the Minches

Passages inside the Great Barrier Reef except for access to Queensland ports

Passages through the Magellan Straits (except for voyages involving Gregory Bay)

(4) Subscriber Nominated Route.

Rates for voyages via any route nominated by a subscriber are available upon

application. Route waypoints may be required. However, if the rate calculated on the basis of the nominated route does not conform to the principles referred to in (1) and (2) above, the subscriber will be so informed and the use of such a rate will be dependent upon specific agreement between the contracting parties. Rates calculated using specific nominated routes will only be available to requesting subscribers.

- (5) The actual route used (laden and ballast) for any rate, whether in the schedule or not, will be provided upon request. Route details are provided alongside relevant rates on the web-site.
- (6) Distances used for rate calculation purposes on the basis of the round voyage appear in the Schedule after the rate and are established by reference to the new BP Shipping Marine Distance Tables (2004) produced by AtoBviaC plc as at 30th September 2014 or, if these tables do not include necessary distances, they are obtained from AtoBviaC plc direct, using the basis upon which the new Distance Tables were developed. The distances shown in the Schedule are for rate calculation and no other purpose. We are advised by AtoBviaC plc that the new distance tables, in both electronic and printed formats, show distances, in nautical miles, that are, in most cases, the shortest sea route or the sea route customarily followed by merchant ships, with the following major distinction; the shortest sea route distances in the new Distance Tables now take into account IMO Conventions, littoral state legislation and published official recommendations for environmentally sensitive routeing.
- (7) For voyages entering an ECA but not calling at a port within that area, subscribers will not be advised of differentials applicable. It is the responsibility of the contracting parties to agree any distance steamed within an ECA. The Associations do not provide a breakdown of the published mileage between the ECA and non-ECA mileages.
- (8) Also see Section 5 of Part A of the Preamble.

[BACK TO CONTENTS](#)

## **7. ASSESSMENT OF PORT COSTS**

See Section 4 and 5 of Part B of the Preamble.

Although some assumptions have to be made, the objective is to include in the rate calculations realistic allowances for all of those port cost items which are levied against the vessel (i.e. are for Owners' Account) even when they are assessed on the quantity of cargo loaded or discharged or by reference to the time spent in port/alongside a berth.

In general terms, this means that allowances are made for vessel's items such as these:

Light              Dues,              both              National              and              Local

|                           |             |           |                           |
|---------------------------|-------------|-----------|---------------------------|
| Pilotage,                 | in          | and       | out                       |
| Towage,                   | in          | and       | out                       |
| Terminal                  |             |           | Fees/Charges              |
| Mooring                   | and         | Unmooring | expenses                  |
| Stand-by                  | Tugs and/or | Stand-by  | Launches, when compulsory |
| Watchmen                  |             |           |                           |
| Conservancy               |             |           | Dues                      |
| Harbour                   |             |           | Dues                      |
| Port                      |             |           | Dues                      |
| Quay                      |             |           | Dues                      |
| Berth                     |             |           | Hire                      |
| Tonnage                   |             |           | Dues                      |
| Wharfage/Dockage/Berthage |             |           |                           |
| Launches                  |             |           |                           |
| Port                      |             |           | Clearance                 |
| Quarantine/Free           |             | Pratique  | Fees                      |
| Customs                   |             |           | Surveillance/Attendance   |
| Customs                   |             |           | Overtime                  |
| Sundries                  |             | and       | Petties                   |
| Agency                    |             |           |                           |
| ISPS Costs                |             |           |                           |

See page Preamble 4, 5. Notes on Calculations (9) regarding ISPS costs.

The above is not a comprehensive list and subscribers may seek clarification from the Associations as to whether or not an allowance has been made for any items that do not fall under one of these broad headings. (Also see Section 4 of part B of the Preamble.)

Occasionally, it will be necessary to make particular items that are levied upon or against the vessel "For Charterers' Account", which means, there being no allowance for such an item in the rate, that Owners are entitled to obtain reimbursement from Charterers for the cost involved. Such items, together with certain others that are directly "For Charterers' Account", are listed in Section 5 of Part B of the Preamble.

#### **When assessing port costs:**

- (a) It is assumed that the standard vessel proceeds direct to the cargo handling place upon arrival at a port.
- (b) The allowance made for an item that is related to time is based upon 48 hours.
- (c) The allowance made for an item that is based upon the quantity of cargo loaded or discharged is always based upon a full cargo for the standard vessel, irrespective of the number of loading or discharging ports on the voyage.
- (d) In cases where a port operates a dual charging system for non segregated and segregated ballast tanks and/or double hulls the port costs have been assessed using the lowest rate.

- (e) For an item that is payable either on a "single-trip" basis or on a reduced "multi-trip" basis the allowance made is on the basis of a "single-trip".
- (f) No allowance is made for any costs that would not be incurred by a vessel of the size of the standard vessel.
- (g) No allowance is made for items or surcharges on items that are incurred only at certain times of the year.

However, in some cases, such items or surcharges are made "For Charterers' Account". See Section 5 of Part B of the Preamble under:

Canada  
 Denmark  
 Estonia  
 Finland  
 Germany  
 Norway  
 Russia  
 Sweden  
 Ukraine  
 U.S.A.

- (h) Also see Section 5 (5) of Part A of the Preamble regarding Tax on Freight and Income Tax.
- (i) Also see Section 5 (8) of Part A of the Preamble regarding deballasting expenses.

[BACK TO CONTENTS](#)

## 8. VARIOUS TRANSIT/VOYAGE EXPENSES

Apart from the port costs described above it is also necessary to include costs incurred during sea passage, canals, straits etc. Listed below are those areas where expenses are incurred and appropriate cost allowance have been made in either the flat rate calculation or shown as a differential:

**ARGENTINA** Pilotage costs & Dredging (when applicable) for passage through the Martin Garcia & Mitre Channels.

**AUSTRALIA** Pilotage costs for passages through the Torres Straits pilotage area and the Hydrographers Passage pilotage area.

**CHILE** Pilotage and Light Dues (when applicable) for transiting the Magellan Straits.

|         |   |
|---------|---|
| DENMARK | Danish Pilotage costs for passages through Skaw, Kattegat, Great and Little Belts and the Sound to and from the Baltic Sea. Tolls and expenses for transiting the Kiel Canal.   |
| EGYPT   | Suez Canal Transit Tolls and expenses are subject to the Fixed Differential shown on page D-2.  |
| ITALY   | Pilotage costs for transiting the Messina Straits.  |
| JAPAN   | Costs of Pilot/escort boats for transiting the Inland Sea and Osaka Bay.  |
| PANAMA  | Panama Canal Transit Tolls are subject to the Fixed Differential on page D-3. Miscellaneous transit expenses are included in the flat rate.   |
| TURKEY  | Pilotage, Sanitary Dues, Light Dues, Life Saving/Salvage Dues, Agency fees and petties incurred whilst transiting the Dardanelles and Bosphorus Straits.  |
|         | In recognition of night navigation restrictions an extra 12 hours has been added to the flat rate calculations for each transit of the Turkish Straits (i.e. a transit of the Dardanelles and the Bosphorus Straits equals one transit of the Turkish Straits for Worldscale purposes). |
| UKRAINE | Pilotage and Channel Dues for transiting the Kertch Straits.  |
| USA     | Pilotage cost and expenses for transiting the Cape Cod Canal and Chesapeake and Delaware Canal.   |

## 9. REVISION POLICY

Worldscale will be completely recalculated once every twelve months providing revised rates effective as from 1st January of each year that reflect changes in bunker prices and port costs (as per page Preamble 3) and also changes in distances provided by AtoBviaC plc on 30th September each year.

For each revision an average worldwide bunker price from October to September prior to the effective date will be used for 380 cst fuel.

For low sulphur fuels the average price, in areas requiring their use, from October to September prior to the effective date will be used.

The bunker prices, which will be assessed by LQM Petroleum Services, Inc., will be stated in Section 4 (d) of Part A of the Preamble.

Port costs used will be those assessed by the Associations in the light of information available to them up to the end of September prior to the effective date. Port costs will be converted from the local currency to USD using the yearly average rate of exchange applicable from the 1st October to the 30th September prior to the effective date. For the guidance of subscribers sample exchange rates

for selected currencies will be stated in Section 4 (e) of Part A of the Preamble.

Interim revisions will be confined to those thought necessary in the judgement of the Associations because of significant changes in port costs arising from tariff revisions at particular ports.

## 10. TRANS-SHIPMENT AREAS

List 3 of Part D of the Preamble shows most of those places and their approximate locations that are presently designated by the Associations as being "trans-shipment areas". This list is arranged by geographical area. Elsewhere in the Schedule, trans-shipment areas are identified by means of the letters TSA in brackets after the name.

The Associations define a trans-shipment area as a place at which cargo is transferred that is outside the limits of a port and where there are no mooring facilities.

All rates for voyages which involve a trans-shipment area shown in List 3 of Part D of the Preamble, whether as a sole loading/discharging place or combined with loading/discharging at a port or ports, are incorporated with other rates throughout the Schedule.

Such rates are calculated in accordance with the basis of calculation set out in Section 4 of Part A of the Preamble, a trans-shipment area being deemed to be a "port" for rate calculation purposes.

Places other than those shown in List 3 of Part D of the Preamble may be designated as "trans-shipment areas" by the Associations. Rates for voyages involving such trans-shipment areas as the sole loading/discharging place are obtainable upon application to the Associations and will be regarded as "official" rates. However, rates for voyages involving partial loading/discharging at any trans-shipment area not shown in List 3 of Section 3 of Part D of the Preamble, combined with a port or ports, will be regarded as "special" rates and their use will be dependent upon agreement between the contracting parties.

List 3 of Part D of the Preamble is subject to revision from time to time.

## **WORLDSCALE 2015**

[BACK TO CONTENTS](#)

### **PREAMBLE PART B**

#### **TERMS AND CONDITIONS**

##### **1. EFFECTIVE DATE**

This edition of Worldscale shall apply for all voyages on which loading is commenced on or after the 1st January 2015, except in the case of amendments that are notified by circulars as being effective from subsequent dates.

##### **2. LAYTIME**

The time allowed for loading and discharging shall be 72 hours and shall be subject to whatever qualifications, if any, that are stated in the applicable charter party or contract.

##### **3. PORT AND TERMINAL COMBINATIONS**

- (1) Any two or more of the places in any one of the combinations shown below are to be regarded, for freight and demurrage purposes, as "berths within a single port".

The first named place (shown in bold print) in the list of such combinations is the port name under which rates are shown in the Schedule and, subject to any fixed or variable rate differential that may apply, the rate shown also applies to any other place in the same group.

- (2) There are no terms and conditions under Worldscale relating to the settlement of shifting costs. The settlement of such costs shall be governed by the terms and conditions of the applicable charter party or contract.
- (3) This list of port and terminal combinations includes most of those that apply for the purposes of Worldscale; however it should not be regarded as a complete list.

Also, in the case of any particular combination shown, there may be places, in addition to those mentioned, that are designated by the Associations as coming within that combination.

- (4) List 1 of Part D of the Preamble includes cross references to places mentioned in this Section of Part B of the Preamble.

## CARIBBEAN AREA

|              |   |
|--------------|---|
| ARUBA:       | All terminals   |
| BAHAMAS:     | (a) <b>Nassau</b> and Clifton Pier<br>(b) <b>Freeport</b> and Borco   |
| COLOMBIA:    | (a) <b>Mamonal</b> and Cartagena<br>(b) <b>Pozos Colorados</b> and Santa Marta  |
| COSTA RICA:  | <b>Port Limon</b> , Moin Bay and Puerto Moin  |
| CUBA:        | (a) <b>Antilla</b> , Preston and Felton<br>(b) <b>Guantanamo</b> (US Base), Boqueron and Deseo<br>(c) <b>Nuevitas</b> , Bufadero, Pastelillo and Tarafa                                     |
| JAMAICA:     | <b>Port Esquivel</b> and Escobedo   |
| PUERTO RICO: | (a) <b>Guayama</b> , Jobos, Puerto de Las Mareas and Arroyo<br>(b) <b>Guayanilla</b> and Tallaboa Bay<br>(c) <b>San Juan</b> , Bayamon and Catano   |
| TRINIDAD:    | <b>Trinidad</b> , Point Lisas, Pointe a Pierre, Point Fortin and Point D'or   |
| VENEZUELA:   | (a) <b>El Palito</b> , Moron, Puerto Cabello and Borburta<br>(b) <b>Puerto la Cruz</b> , Guaraguao Terminal (El Chaure), Jose Monobuoy, Jose Platform (TAECJ), Jose Terminal and Petrozuata |

(c) **Paraguana Refinery Center - CRP**, Amuay Bay,  
Las Piedras, Punta Cardon and Punta Fijo

## MEXICO

- (a) **Coatzacoalcos**, Nanchital, Pajaritos, Rabon Grande and Puerto Mexico
- (b) **Tampico**, Ciudad Madero, Altimira and Tamaulipas
- (c) **Lazaro Cardenas** (Mexico) and Bahia de Petacalco
- (d) **Takuntah FSO** and Cantarell Offshore Terminal

## U.S. GULF

|                    |  |
|--------------------|--|
| BAYTOWN:           | <b>Baytown</b> , Bayport, Lynchburg and Seabrook   |
| BEAUMONT:          | <b>Beaumont</b> , Atreco, Magpetco, Nederland, Orange, Port Arthur, Port Neches, Sabine and Smiths Bluff   |
| BROWNSVILLE:       | <b>Brownsville</b> and Port Isabel   |
| CORPUS CHRISTI:    | <b>Corpus Christi</b> , Aransas Pass, Harbor Island and Ingleside  |
| HOUSTON:           | All ports and terminals on the Houston Ship Channel, west of Lynchburg, including Galena Park, Deer Park and Pasadena  |
| LAKE CHARLES:      | <b>Lake Charles</b> , Clifton Ridge and Devil's Elbow  |

#### **4. OWNERS ACCOUNT**

Dues and other charges which are levied upon or against the vessel, even when assessed on the quantity of cargo loaded or discharged, shall be paid by Owners and shall be for Owners' Account. However, Owners shall be reimbursed by Charterers for costs they have incurred in respect of items specified as being "For Charterers' Account" in Section 5 of Part B of the Preamble.

See page Preamble 4, 5. Notes on Calculations (9) regarding ISPS costs.

Rates for this position do not apply for Fujairah Offshore Anchorage Area 'S',  
\* rates for which are quoted on the web-site or upon application to the  
Associations.

## **WORLDSCALE 2015**

[BACK TO CONTENTS](#)

## **SUPPLEMENTARY MESSAGES**

- (1) In the absence of firm information regarding port costs incurred at this port please note that no allowance for such costs has been made in calculating this rate. Therefore it is the responsibility of the contracting parties to agree between themselves a method of settlement in respect of any port costs which may be incurred.
- (2) In the absence of firm information regarding port costs or Kertch Straits transit expenses incurred at this port please note that no allowance for such costs has been made in calculating this rate. Therefore it is the responsibility of the contracting parties to agree between themselves a method of settlement in respect of any port costs/transit expenses which may be incurred.
- (3) In the absence of firm information regarding towage costs incurred at this port please note that no allowance for such costs has been made in calculating this rate. Therefore it is the responsibility of the contracting parties to agree between themselves a method of settlement in respect of any towage expenses which may be incurred.
- (4) Please refer to page Preamble 7, 10. TRANS-SHIPMENT AREAS, paragraph 5. Rates for voyages involving partial loading/discharging at any trans-shipment area **not** shown in List 3 of Section 3 of Part D of the preamble, combined with a port or ports, will be regarded as 'special rates' and their use will be dependent upon agreement between the contracting parties." This rate is therefore a 'special' rate.
