

The Think Tank Index

It's no accident that Barack Obama plucked his transition chief from a think tank. The world's idea factories are charged with brainstorming solutions to everything from global warming to Wall Street's implosion to the war on terror. In the first index of its kind, FP ranks the world's best think tanks. | By James McGann

In Washington, it's not for nothing that think tanks are called "governments in waiting." Presidents seek them out because they are critical to the global ideas industry. Far more than simply churning out endless papers, think tank wonks generate and fine-tune solutions to some of the most complex and vexing issues of the day. Leaders around the world need them to provide independent analysis, help set policy agendas, and bridge the gap between knowledge and action.

But not all think tanks are created equal. There are some 5,500 think tanks worldwide, in nearly 170 countries. Some organizations specialize in security; others in the environment. Some are intensely partisan; others fiercely independent. Some have budgets in the tens of millions of dollars; others are one-person operations. Some are already changing the world with their big ideas; others merely aspire to.

Until now, there has been no guide to this rapidly growing global industry. The **Think Tank Index** is the first comprehensive ranking of the world's top think tanks, based on a worldwide survey of hundreds of scholars and experts. Think of it as an insider's guide to the competitive marketplace for ideas that matter.
